

Tasks To Be Performed:

1. Based on what you have learnt in the class, do the following steps:
 - a. Create a new folder
 - b. Put the following files in the folder
 - Code.txt
 - Log.txt
 - Output.txt
 - c. Stage the Code.txt and Output.txt files
 - d. Commit them
 - e. And finally push them to GitHub
2. Please share the commands for the above points

EC2 > Instances > Launch an instance

Launch an instance Info

Amazon EC2 allows you to create virtual machines, or instances, that run on the AWS Cloud. Quickly get started by following the simple steps below.

▼ Application and OS Images (Amazon Machine Image) Info

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. Search or Browse for AMIs if you don't see what you are looking for
